

SDG Goal 15	Life on land
SDG Target 15.9	By 2020, integrate ecosystem and biodiversity values into national and local planning, development processes, poverty reduction strategies and accounts
SDG Indicator 15.9.1	(a) Number of countries that have established national targets in accordance with or similar to Aichi Biodiversity Target 2 of the Strategic Plan for Biodiversity 2011–2020 in their national biodiversity strategy and action plans and the progress reported towards these targets; and (b) integration of biodiversity into national accounting and reporting systems, defined as implementation of the System of Environmental-Economic Accounting
Time series	Implementation and progress on national targets in accordance with or similar to Aichi Biodiversity Target 2 of the Strategic Plan for Biodiversity 2011-2020

1. General information on the time series

- Date of national metadata: 1 September 2022
- National data: <http://sdg-indicators.de/15-9-1/>
- Definition: The time series measures a score between 0 and 1 for the implementation of a national target for the Aichi Biodiversity Target 2.
- Disaggregation: Not available.

2. Comparability with the global metadata

- Date of global metadata: July 2021
- Global metadata: <https://unstats.un.org/sdgs/metadata/files/Metadata-15-09-01.pdf>
- The time series is compliant with the global metadata.

3. Data description

- The score of the indicator can vary between 0 and 1. A value of 0 means that no national target reflecting Aichi Biodiversity Target 2 has been set. A maximum value of 1 means that a national target exists and progress is on track to exceed it. The evaluation of the score is based on the Sixth National Report for the Convention on Biological Diversity.

4. Access to data source

- Sixth National Report for the Convention on Biological Diversity:

5. Metadata on source data

- Not available.

6. Timeliness and frequency

- Timeliness: Not available.
- Frequency: Not available.

7. Calculation method

- Unit of measurement: No unit
- Calculation:

Not applicable.

SDG Goal 15

Life on land

SDG Target 15.9

By 2020, integrate ecosystem and biodiversity values into national and local planning, development processes, poverty reduction strategies and accounts

SDG Indicator 15.9.1

(a) Number of countries that have established national targets in accordance with or similar to Aichi Biodiversity Target 2 of the Strategic Plan for Biodiversity 2011–2020 in their national biodiversity strategy and action plans and the progress reported towards these targets; and (b) integration of biodiversity into national accounting and reporting systems, defined as implementation of the System of Environmental-Economic Accounting

Time series

Implementation of the System of Environmental-Economic Accounting (SEEA)

1. General information on the time series

- Date of national metadata: 1 September 2022
- National data: <http://sdg-indicators.de/15-9-1/>
- Definition: The time series measures a score between 0 and 3 for the implementation of biodiversity values into national accounting and reporting systems, defined as implementation of the System of Environmental-Economic Accounting (SEEA).
- Disaggregation: Not available.

2. Comparability with the global metadata

- Date of global metadata: July 2021
- Global metadata: <https://unstats.un.org/sdgs/metadata/files/Metadata-15-09-01.pdf>
- The time series is compliant with the global metadata.

3. Data description

- Data stems from the the Global Assessment of Environmental-Economic Accounting and Supporting Statistics survey administered by the UNSD. The Global Assessment collects information on whether countries are currently planning or implementing System of Environmental-Economic Accounting (SEEA) accounts, the specific accounts being implemented and plans for new/future accounts. The sub-indicator disaggregates implementation into three progressive stages. A score of 0 means "No compilation", 1 means "Compilation", 2 "Dissemination" and 3 "Regular compilation and dissemination".

Since the accounts of the SEEA have been regularly compiled and published in Germany since the mid-1990s, the data presented here are transferred accordingly to the reporting years in which no survey of the Global Assessment of Environmental-Economic Accounting and Supporting Statistics took place.

4. Access to data source
