

SDG Goal 17

Partnerships for the goals

SDG Target 17.19

By 2030, build on existing initiatives to develop measurements of progress on sustainable development that complement gross domestic product, and support statistical capacity-building in developing countries

SDG Indicator 17.19.2

Proportion of countries that (a) have conducted at least one population and housing census in the last 10 years; and (b) have achieved 100 per cent birth registration and 80 per cent death registration

Time series

At least one population and housing census in the last 10 years conducted

1. General information on the time series

- Date of national metadata: 02 February 2022
- National data: <http://sdg-indikatoren.de/en/17-19-2/>
- Definition: The time series measures, if Germany has conducted at least one population and housing census in the last 10 years.
- Disaggregation: Not available.

2. Comparison with global metadata

- Date of global metadata: July 2016
- Global metadata: <https://unstats.un.org/sdgs/metadata/files/Metadata-17-19-02a.pdf>
- The time series is compliant with the global metadata, but refers only to Germany and not to all UN-member countries.

3. Data description

- The SDG indicator is not a statistical one. Therefore the time series states, if in the last ten years a population and housing census was conducted.

4. Accessibility of source data

- 2011 Census:
https://www.zensus2011.de/EN/Home/home_node.html
- Federal Act Governing register-based Census in 2011 (ZensG 2011) as amended (only available in German):
http://www.gesetze-im-internet.de/zensg_2011/BJNR178110009.html

5. Metadata on source data

- Methodology of the 2011 Census:
https://www.zensus2011.de/EN/2011Census/Methodology/Methodology_node.html

6. Timeliness and frequency

- Timeliness: Not applicable.
- Frequency: Annual

7. Calculation method

- Unit of measurement: Number
- Calculation method:

Not applicable.

SDG Goal 17

Partnerships for the goals

SDG Target 17.19

By 2030, build on existing initiatives to develop measurements of progress on sustainable development that complement gross domestic product, and support statistical capacity-building in developing countries

SDG Indicator 17.19.2

Proportion of countries that (a) have conducted at least one population and housing census in the last 10 years; and (b) have achieved 100 per cent birth registration and 80 per cent death registration

Time series

Birth registration

1. General information on the time series

- Date of national metadata: 02 February 2022
- National data: <http://sdg-indikatoren.de/en/17-19-2/>
- Definition: The time series measures the proportion of births which have been registered.
- Disaggregation: Not available.

2. Comparison with global metadata

- Date of global metadata: March 2021
- Global metadata: <https://unstats.un.org/sdgs/metadata/files/Metadata-17-19-02b.pdf>
- The time series is not compliant with the global metadata, because it refers to the proportion of registered births.

3. Data description

- The SDG indicator is not a statistical one. It rather refers to quality assurance of the statistic. Therefore the time series reflects the quality evaluation.

4. Accessibility of source data

- Births:
https://www.destatis.de/EN/Themes/Society-Environment/Population/Births/_node.html
- Civil Status Act (PStG) as amended (only available in German):
<https://www.gesetze-im-internet.de/pstg/>

5. Metadata on source data

- Not available.

6. Timeliness and frequency

- Timeliness: Not applicable.
- Frequency: Annual

7. Calculation method

- Unit of measurement: Percentage
- Calculation method:

$$\text{Birthregistration} = \frac{\text{Registered births [number]}}{\text{Births [number]}} \cdot 100 [\%]$$

SDG Goal 17

Partnerships for the goals

SDG Target 17.19

By 2030, build on existing initiatives to develop measurements of progress on sustainable development that complement gross domestic product, and support statistical capacity-building in developing countries

SDG Indicator 17.19.2

Proportion of countries that (a) have conducted at least one population and housing census in the last 10 years; and (b) have achieved 100 per cent birth registration and 80 per cent death registration

Time series

Death registration

1. General information on the time series

- Date of national metadata: 02 February 2022
- National data: <http://sdg-indikatoren.de/en/17-19-2/>
- Definition: The time series measures the proportion of deaths which have been registered.
- Disaggregation: Not available.

2. Comparison with global metadata

- Date of global metadata: March 2021
- Global metadata: <https://unstats.un.org/sdgs/metadata/files/Metadata-17-19-02b.pdf>
- The time series is not compliant with the global metadata, because it refers to the proportion of registered deaths.

3. Data description

- The SDG indicator is not a statistical one. It rather refers to quality assurance of the statistic. Therefore the time series reflects the quality evaluation.

4. Accessibility of source data

- Deaths, life expectancy:
https://www.destatis.de/EN/Themes/Society-Environment/Population/Deaths-Life-Expectancy/_node.html
- Civil Status Act (PStG) as amended (only available in German):
<https://www.gesetze-im-internet.de/pstg/>

5. Metadata on source data

- Not available.

6. Timeliness and frequency

- Timeliness: Not applicable.
- Frequency: Annual

7. Calculation method

- Unit of measurement: Percentage
- Calculation method:

$$\text{Death registration} = \frac{\text{Registered deaths [number]}}{\text{Deaths [number]}} \cdot 100 [\%]$$
