

SDG Goal 16	Peace, justice and strong institutions
SDG Target 16.1	Significantly reduce all forms of violence and related death rates everywhere
SDG Indicator 16.1.2	Conflict-related deaths per 100,000 population, by sex, age and cause
Time series	Conflict-related deaths

1. General information on the time series

- Date of national metadata: 30 September 2021
- National data: <http://sdg-indikatoren.de/en/16-1-2/>
- Definition: The time series shows the total number of conflict-related deaths per 100,000 inhabitants.
- Disaggregation: Not available.

2. Comparison with global metadata

- Date of global metadata: December 2018
- Global metadata: <https://unstats.un.org/sdgs/metadata/files/Metadata-16-01-02.pdf>
- The time series is partly compliant with the global metadata. It only covers killed adult persons aged 18 and above and causes of death due to heavy weapons and explosive munitions, planted explosives and unexploded ordnance (UXO) and small arms and light weapons.

3. Data description

- The data on conflict-related deaths is based on a special evaluation by the Federal Ministry of Defence. The data covers killed adult persons aged 18 and above and causes of death due to heavy weapons and explosive munitions, planted explosives and unexploded ordnance (UXO) and small arms and light weapons.

4. Accessibility of source data

Data based on a special evaluation.

5. Metadata on source data

Data based on a special evaluation.

6. Timeliness and frequency

- Timeliness: Not available.
- Frequency: Annual

7. Calculation method

- Unit of measurement: Per 100,000 inhabitants
- Calculation method:

Data based on a special evaluation.
