

SDG Goal 14

Life below water

SDG Target 14.5

By 2020, conserve at least 10 per cent of coastal and marine areas, consistent with national and international law and based on the best available scientific information

SDG Indicator 14.5.1

Coverage of protected areas in relation to marine areas

Time series

Marine Key Biodiversity Areas (KBAs) covered by protected areas

1. General information on the time series

- Date of national metadata: 02 February 2022
- National data: <http://sdg-indikatoren.de/en/14-5-1/>
- Definition: The time series measures the proportion of marine Key Biodiversity Areas (KBAs) that is covered by protected areas.
- Disaggregation: Not available.

2. Comparison with global metadata

- Date of global metadata: July 2021
- Global metadata: <https://unstats.un.org/sdgs/metadata/files/Metadata-14-05-01.pdf>
- The time series is partly compliant with the global metadata. It is calculated as the percentage of Key Biodiversity Areas covered by protected areas and not the mean percentage of each Key Biodiversity Area that is covered by protected areas.

3. Data description

- The data is based on a special evaluation. For the calculation of the marine area under protection, all protected areas except for nature parks and UNESCO-MAB Biosphere reserves are considered. Data on protected areas was downloaded from the Protected Planet webpage. Data on Key Biodiversity Areas was provided by the Nature And Biodiversity Conservation Union (NABU) for Germany. Marine waters include the territorial waters and the Exclusive Economic Zone (EEZ) of Germany. To distinguish marine from terrestrial areas, definitions of the Digital Land Cover Model (LBM-DE) and the Water Framework Directive (2000/60/EC) were taken into account. To be as precise as possible, the time series is calculated as the percentage of Key Biodiversity Areas covered by protected areas and not the mean percentage of each Key Biodiversity Area that is covered by protected areas as described in the global metadata.

4. Accessibility of source data

- Data on protected areas:
<https://www.protectedplanet.net/country/DEU>
- Data on Key Biodiversity Areas (only available in German):
<https://bergenhusen.nabu.de/forschung/ibas/index.html>

5. Metadata on source data

- Metadata on protected areas:
<https://www.protectedplanet.net/en/thematic-areas/wdpa?tab=Methodology>
- Digital Land Cover Model for Germany, state 2015 (LBM-DE2015) (only available in German):
<https://gdz.bkg.bund.de/index.php/default/digitales-landbedeckungsmodell-fur-deutschland-stand-2015-lbm-de2015.html>
- Digital Land Cover Model for Germany, state 2018 (LBM-DE2018) (only available in German):
<https://gdz.bkg.bund.de/index.php/default/digitales-landbedeckungsmodell-fur-deutschland-stand-2018-lbm-de2018.html>
- Data on Key Biodiversity Areas (only available in German):
<https://bergenhusen.nabu.de/forschung/ibas/index.html>

6. Timeliness and frequency

- Timeliness: Not applicable.
- Frequency: Annual

7. Calculation method

- Unit of measurement: Percentage
- Calculation method:

$$\text{Marine Key Biodiversity Areas (KBAs) covered by protected areas} = \frac{\text{Protected marine KBA}}{\text{Total area of marine KBA}} \cdot 100 [\%]$$

SDG Goal 14
