

<b>SDG Goal 9</b>	<b>Industry, innovation and infrastructure</b>
<b>SDG Target 9.3</b>	<b>Increase the access of small-scale industrial and other enterprises, in particular in developing countries, to financial services, including affordable credit, and their integration into value chains and markets</b>
<b>SDG Indicator 9.3.1</b>	<b>Proportion of small-scale industries in total industry value added</b>
<b>Time series</b>	<b>Gross value added of small-scale industries in manufacturing</b>

### 1. General information on the time series

- Date of national metadata: 7 December 2022
- National data: <http://sdg-indicators.de/9-3-1/>
- Definition: The time series measures the share of gross value added (at factor costs) of small-scale enterprises in manufacturing. Small-scale enterprises are defined as enterprises with less than 20 persons employed. The manufacturing sector is classified in section C of the national classification of economic activities, version 2008 (WZ 2008). The WZ 2008 is concerning section C compliant with the European classification (NACE Rev. 2) and the international classification (ISIC Rev. 4).
- Disaggregation: Not available.

### 2. Comparability with the global metadata

- Date of global metadata: March 2023
- Global metadata: <https://unstats.un.org/sdgs/metadata/files/Metadata-09-03-01.pdf>
- The time series is partly compliant with the global metadata. It uses value added at factor costs instead of basic prices.

### 3. Data description

- Secondary statistical analysis of the Structural Business Statistics (SBS) of the Federal Statistical Office. All SBS are based on European Regulations. The source of data on enterprises with less than 20 persons employed in the manufacturing sector is the so-called structure statistics in the manufacturing, mining and quarrying of the Federal Statistical Office. In this statistics a stratified random sample is used for surveying the relevant data.

### 4. Access to data source

- Annual enterprise statistics – Eurostat table [sbs\_sc\_sca\_r2]:  
[https://ec.europa.eu/eurostat/databrowser/view/sbs\\_sc\\_sca\\_r2/default/table?lang=en](https://ec.europa.eu/eurostat/databrowser/view/sbs_sc_sca_r2/default/table?lang=en)

### 5. Metadata on source data

- Quality Report – Structure Statistics in Manufacturing, Mining and Quarrying (only available in German):  
<https://www.destatis.de/DE/Methoden/Qualitaet/Qualitaetsberichte/Industrie-Verarbeitendes-Gewerbe/struktur-verarbeitendes-gewerbe.pdf>

### 6. Timeliness and frequency

- Timeliness: t + 18 months
- Frequency: Annual

## 7. Calculation method

- Unit of measurement: Percentage
- Calculation:

$$\text{Gross value added of small - scale industries in manufacturing} = \frac{\text{Gross value added of small - scale enterprises in manufacturing [EUR]}}{\text{Total gross value added in manufacturing [EUR]}} \cdot 100 [\%]$$
