

## SDG Goal 15

## Life on land

### SDG Target 15.1

By 2020, ensure the conservation, restoration and sustainable use of terrestrial and inland freshwater ecosystems and their services, in particular forests, wetlands, mountains and drylands, in line with obligations under international agreements

### SDG Indicator 15.1.2

Proportion of important sites for terrestrial and freshwater biodiversity that are covered by protected areas, by ecosystem type

### Time series

Terrestrial and freshwater Key Biodiversity Areas (KBAs) covered by protected areas

## 1. General information on the time series

- Date of national metadata: 28 April 2021
- National data: <http://sdg-indikatoren.de/en/15-1-2/>
- Definition: The time series measures the proportion of terrestrial and freshwater Key Biodiversity Areas (KBAs) that is covered by protected areas.
- Disaggregation: Not available.

## 2. Comparison with global metadata

- Date of global metadata: February 2020
- Global metadata: <https://unstats.un.org/sdgs/metadata/files/Metadata-15-01-02.pdf>
- The time series is compliant with the global metadata.

## 3. Data description

- For the calculation of the terrestrial and freshwater area under protection, all protected areas except for nature parks and UNESCO-MAB Biosphere reserves are considered. Data on protected areas was downloaded from the Protected Planet webpage. Data on Key Biodiversity areas was provided by the Nature And Biodiversity Conservation Union (NABU) for Germany. To distinguish marine from terrestrial and freshwater areas, definitions of the Digital Land Cover Model (LBM-DE) and the Water Framework Directive (2000/60/EC) were taken into account. To be as precise as possible, the time series is calculated as the percentage of Key Biodiversity Areas covered by protected areas and not the mean percentage of each Key Biodiversity Area that is covered by protected as described in the global metadata.

## 4. Accessibility of source data

- Data on protected areas:  
<https://www.protectedplanet.net/country/DEU>
- Data of the Digital Land Cover Model (LBM-DE) is available for a fee, and only in German.:  
<https://gdz.bkg.bund.de/index.php/default/digitales-landbedeckungsmodell-fur-deutschland-stand-2015-lbm-de2015.html>  
<https://gdz.bkg.bund.de/index.php/default/digitales-landbedeckungsmodell-fur-deutschland-stand-2018-lbm-de2018.html>
- Data on Key Biodiversity Areas (in German only):  
<https://bergenhusen.nabu.de/forschung/ibas/index.html>

## 5. Metadata on source data

- Metadata on protected areas:

<https://www.protectedplanet.net/en/thematic-areas/wdpa?tab=Methodology>

- Metadata on the Digital Land Cover Model (LBM-DE) (in German only):

<https://gdz.bkg.bund.de/index.php/default/digitales-landbedeckungsmodell-fur-deutschland-stand-2015-lbm-de2015.html>

<https://gdz.bkg.bund.de/index.php/default/digitales-landbedeckungsmodell-fur-deutschland-stand-2018-lbm-de2018.htm>

- Metadata on Key Biodiversity Areas (in German only):

<https://bergenhusen.nabu.de/forschung/ibas/index.html>

## 6. Timeliness and frequency

- Timeliness: Not applicable.
- Frequency: Annual

## 7. Calculation method

- Unit of measurement: %
- Calculation method:

**Key Biodiversity Areas (KBAs)**  
**covered by protected areas** =  $\frac{\text{Protected land KBA}}{\text{Total area of land KBA}} \cdot 100 [\%]$

## SDG Goal 15

## Life on land

### SDG Target 15.1

By 2020, ensure the conservation, restoration and sustainable use of terrestrial and inland freshwater ecosystems and their services, in particular forests, wetlands, mountains and drylands, in line with obligations under international agreements

### SDG Indicator 15.1.2

Proportion of important sites for terrestrial and freshwater biodiversity that are covered by protected areas, by ecosystem type

### Time series

Terrestrial and freshwater areas covered by protected areas

## 1. General information on the time series

- Date of national metadata: 28 April 2021
- National data: <http://sdg-indikatoren.de/en/15-1-2/>
- Definition: The time series measures the protected terrestrial and freshwater area in relation to the total terrestrial and freshwater area.
- Disaggregation: Not available.

## 2. Comparison with global metadata

- Date of global metadata: February 2020
- Global metadata: <https://unstats.un.org/sdgs/metadata/files/Metadata-15-01-02.pdf>
- The time series is not compliant with the global metadata, but provides additional information.

## 3. Data description

- For the calculation of the terrestrial and freshwater area under protection, all protected areas except for nature parks and UNESCO-MAB Biosphere reserves are considered. Data on protected areas was downloaded from the Protected Planet webpage. To distinguish marine from terrestrial and freshwater areas, definitions of the Digital Land Cover Model (LBM-DE) and the Water Framework Directive (2000/60/EC) were taken into account.
