

SDG Goal 7	Affordable and clean energy
SDG Target 7.1	By 2030, ensure universal access to affordable, reliable and modern energy services
SDG Indicator 7.1.2	Proportion of population with primary reliance on clean fuels and technology
Time series	Population with primary reliance on clean fuels and technology

1. General information on the time series

- Date of national metadata: 12 January 2022
- National data: <http://sdg-indikatoren.de/en/7-1-2/>
- Definition: The time series measures the share of the population with access to clean fuels and technologies for cooking, heating and lighting. For countries classified as high-income, it is assumed that a complete transition to using clean fuels and technologies has been made. Therefore, for these countries no data are collected and it is assumed that more than 95% have access to clean fuels and technologies.
- Disaggregation: Not available.

2. Comparison with global metadata

- Date of global metadata: March 2021
- Global metadata: <https://unstats.un.org/sdgs/metadata/files/Metadata-07-01-02.pdf>
- The time series is compliant with the global metadata.

3. Data description

- Countries classified as high-income with a Gross National Income (GNI) of more than US dollar 12,746 per capita are assumed to have made a complete transition to using clean fuels and technologies as the primary domestic energy source for cooking and the primary reliance on pollution fuels and technologies use is reported to be less than 5%.

4. Accessibility of source data

- Not applicable.

5. Metadata on source data

- Not applicable.

6. Timeliness and frequency

- Timeliness: Not applicable.
- Frequency: Not applicable.

7. Calculation method

- Unit of measurement: Percentage
- Calculation method:

Not applicable.
