

<b>SDG Goal 6</b>	<b>Clean water and sanitation</b>
<b>SDG Target 6.5</b>	<b>By 2030, implement integrated water resources management at all levels, including through transboundary cooperation as appropriate</b>
<b>SDG Indicator 6.5.1</b>	<b>Degree of integrated water resources management</b>
<b>Time series</b>	<b>Degree of integrated water resources management implementation</b>

### 1. General information on the time series

- Date of national metadata: 02 February 2022
- National data: <http://sdg-indikatoren.de/en/6-5-1/>
- Definition: The time series measures the existence of policies and instruments ensuring the integrated management of water resources.
- Disaggregation: Not available.

### 2. Comparison with global metadata

- Date of global metadata: February 2021
- Global metadata: <https://unstats.un.org/sdgs/metadata/files/Metadata-06-05-01.pdf>
- The time series is compliant with the global metadata.

### 3. Data description

- The data is derived from the information in the country questionnaire for SDG Indicator 6.5.1, reported by the Federal Ministry for the Environment, Nature Conservation and Nuclear Safety (BMU). The questionnaire consists of four sections with several questions within each section. Each answer is assigned a score between 0 (very low) and 100 (very high).

### 4. Accessibility of source data

- Not available.

### 5. Metadata on source data

- Not available.

### 6. Timeliness and frequency

- Timeliness: Not applicable.
- Frequency: Every 3 years

## 7. Calculation method

- Unit of measurement: Percentage
- Calculation method:

In a first step, the average score of each of the four sections is calculated by averaging all questions scores in each section.

In a second step, the average of the four section scores is calculated to give the overall score for indicator 6.5.1.
