

<b>SDG Goal 9</b>	<b>Industry, innovation and infrastructure</b>
<b>SDG Target 9.b</b>	<b>Support domestic technology development, research and innovation in developing countries, including by ensuring a conducive policy environment for, inter alia, industrial diversification and value addition to commodities</b>
<b>SDG Indicator 9.b.1</b>	<b>Proportion of medium and high-tech industry value added in total value added</b>
<b>Time series</b>	<b>Gross value added of medium- and high-tech industries to total manufacturing value added</b>

## 1. General information on the time series

- Date of national metadata: 06 July 2021
- National data: <http://sdg-indikatoren.de/en/9-b-1/>
- Definition: Gross value added (GVA) of medium-tech (MHT) and high-tech industries (HIT) to total manufacturing value added is defined as GVA (at factor costs) of enterprises with their main economic activity in MHT or HIT in proportion to total GVA of manufacturing. Following the Commission Regulation (EU) 2020/1197 of 30 July 2020 MHT are:
  - 20 Manufacture of chemicals and chemical products
  - 25.4 Manufacture of weapons and ammunition
  - 27 Manufacture of electrical equipment
  - 28 Manufacture of machinery and equipment n.e.c.
  - 29 Manufacture of motor vehicles, trailers and semi-trailers
  - 30 Manufacture of other transport equipment (excluding 30.1 Building of ships and boats and 30.3)
    - o 30.2 Manufacture of railway locomotives and rolling stock
    - o 30.4 Manufacture of military fighting vehicles
    - o 30.9 Manufacture of transport equipment n.e.c.
  - 32.5 Manufacture of medical and dental instruments and supplies
- and HIT are:
  - 21 Manufacture of basic pharmaceutical products and pharmaceutical preparations
  - 26 Manufacture of computer, electronic and optical products
  - 30.3 Manufacture of air and spacecraft and related machinery

according to the national classification of economic activities, version 2008 (WZ 2008). Manufacturing is classified as section C of WZ 2008. The WZ 2008 is compliant with the European classification (NACE Rev. 2) and similar to the international classification (ISIC Rev. 4).

- Disaggregation:

## 2. Comparison with global metadata

- Date of global metadata: February 2021
- Global metadata: <https://unstats.un.org/sdgs/metadata/files/Metadata-09-0B-01.pdf>
- The time series is compliant with the global metadata. The definition of GVA (basic prices or factor costs) is not clearly determined in the international metadata. Additionally, the international metadata description of the SDG indicator 9.b.1 does not foresee a separate publication of MHT and HIT.

### 3. Data description

- The data are gained in two separate statistics of the Federal Statistical Office by a stratified random sample, namely the structure statistics and the cost structure statistics in the manufacturing, mining and quarrying. The first, the structure statistics captures enterprises with less than 20 persons employed and the second, the cost structure statistics surveys enterprises with 20 and more persons employed. Both statistics base on an European Regulation.

### 4. Accessibility of source data

- Not available.

### 5. Metadata on source data

- Quality report of structure statistics in manufacturing, mining and quarrying(Only available in German):  
<https://www.destatis.de/DE/Methoden/Qualitaet/Qualitaetsberichte/Industrie-Verarbeitendes-Gewerbe/struktur-verarbeitendes-gewerbe.pdf>
- Quality report of cost structure statistics in manufacturing, mining and quarrying(Only available in German):  
<https://www.destatis.de/DE/Methoden/Qualitaet/Qualitaetsberichte/Industrie-Verarbeitendes-Gewerbe/kostenstruktur-verarbeitendes-gewerbe.pdf>
- Eurostat - Glossary: High-tech classification of manufacturing industries:  
[https://ec.europa.eu/eurostat/statistics-explained/index.php?title=Glossary:High-tech\\_classification\\_of\\_manufacturing\\_industries](https://ec.europa.eu/eurostat/statistics-explained/index.php?title=Glossary:High-tech_classification_of_manufacturing_industries)

### 6. Timeliness and frequency

- Timeliness: t + 18 months
- Frequency: Annual

### 7. Calculation method

- Unit of measurement: %
- Calculation method:

$$\text{Gross value added}_i = \frac{\text{Gross value added}_i[\text{EUR}]}{\text{Gross value added of section C}[\text{EUR}]} \cdot 100[\%]$$

$$i \in \{\text{MHT; HIT}\}$$
