SDG Goal 16	**Peace, justice and strong institutions**
SDG Target 16.7	**Ensure responsive, inclusive, participatory and representative decision-making at all levels**
SDG Indicator 16.7.1	**Proportions of positions in national and local institutions, including (a) the legislatures; (b) the public service; and (c) the judiciary, compared to national distributions, by sex, age, persons with disabilities and population groups**
Time series	**Ratio of female members in the public service**

1. General information on the time series

- Date of national metadata: 3 August 2022
- National data: http://sdg-indicators.de/16-7-1/
- Definition: The time series measures the proportion of women in the public service and assesses how this proportion corresponds to the proportion in society as a whole. Furthermore, the time series depicts the representation across different fields of work.
- Disaggregation: field of work

2. Comparability with the global metadata

- Date of global metadata: March 2022
- Global metadata: https://unstats.un.org/sdgs/metadata/files/Metadata-16-07-01b.pdf
- The time series is compliant with the global metadata.

3. Data description

- The time series is a ratio of the proportion of women in the public service and the proportion of the female labor force. The numerator includes the public sector personnel at the federal and Länder levels. Furthermore, it is disaggregated by the following fields of work:
    - Political leadership and central administration, foreign affairs
    - Police
    - Education, science, research, cultural affairs
    - Health, environment, sports and recreation

  Excluded are the local government units, military and public corporations and quasi owned and controlled by government units. The count of public sector personnel is specified in full-time equivalents of employees as of June 30 of the respective year. The denominator depicts the proportion of women in the labor force respectively at the age 15 to 64.

4. Access to data source

- Civil service personnel - Fachserie 14 series 6 (only available in German): https://www.destatis.de/DE/Themen/Staat/Oeffentlicher-Dienst/Publikationen/Downloads-Oeffentlicher-Dienst/personal-oeffentlicher-dienst-2140600207004.html

5. Metadata on source data

- Not available.

6. Timeliness and frequency

- Timeliness: t + 12 months
- Frequency: Annual

7. Calculation method

- Unit of measurement: No unit
- Calculation:

$$\textbf{Female representation ratios} = \frac{\text{Proportion of female public servants in field of work } x\,[\%]}{\text{Proportion of women in the working age population}\,[\%]}$$

SDG Goal 16	**Peace, justice and strong institutions**
SDG Target 16.7	**Ensure responsive, inclusive, participatory and representative decision-making at all levels**
SDG Indicator 16.7.1	**Proportions of positions in national and local institutions, including (a) the legislatures; (b) the public service; and (c) the judiciary, compared to national distributions, by sex, age, persons with disabilities and population groups**
Time series	**Ratio of female members in the judiciary**

1. General information on the time series

- Date of national metadata: 3 August 2022
- National data: http://sdg-indicators.de/16-7-1/
- Definition: The time series measures the proportion of women in the judiciary and assesses how this proportion corresponds to the proportion in society as a whole. Furthermore, the time series depicts the representation across different levels of court.
- Disaggregation: level of court

2. Comparability with the global metadata

- Date of global metadata: March 2022
- Global metadata: https://unstats.un.org/sdgs/metadata/files/Metadata-16-07-01c.pdf
- The time series is compliant with the global metadata.

3. Data description

- The time series is a ratio of the proportion of women in the judiciary and the proportion of the female labor force. The numerator includes the judges of the following levels of court:
  - Supreme/Constitutional courts
  - Higher-level courts
  - Lower-level courts

  Counted are only judges and not registrars, prosecutors, etc. The count of judges is specified in full-time equivalents of employees as of December 31 of the respective year. The denominator depicts the proportion of women in the labor force respectively at the age 15 to 64.
