DESTATIS | Statistisches Bundesamt

ZIELE FÜR NACHHALTIGE ENTWICKLUNG

SDG Goal 16	Peace, justice and strong institutions
SDG Target 16.1	Significantly reduce all forms of violence and related death rates everywhere
SDG Indicator 16.1.3	Proportion of population subjected to (a) physical violence; (b) psychological violence; and (c) sexual violence in the previous 12 months
Time series	Population who were exposed to physical violence

1. General information on the time series

- Date of national metadata: 30 September 2021
- National data: http://sdg-indikatoren.de/en/16-1-3/
- Definition: The time series shows the percentage of the population that has been a victim of a physical assault in the previous 12 months.
- Disaggregation: Not available.

2. Comparison with global metadata

- Date of global metadata: July 2016
- Global metadata: https://unstats.un.org/sdgs/metadata/files/Metadata-16-01-03.pdf
- The time series is compliant with the global metadata.

3. Data description

- The data are taken from the German Victimization Survey. The survey is telephone based with 35.503 observations for the year 2012. It is based on a random sample of the population living in private households, being 16 years or older and being available via telephone.
Since people with relative high education levels are overrepresented in the sample and young adults (age 18-34) are underrepresented compared to the general population, the answers were weighted to account for the unequal probability of taking part in the survey for these subgroups.
For this time series, the answer to the question whether an individual was at least once victim of a physical assault in the last 12 months was used.

4. Accessibility of source data

- German Victimization Survey 2017 (only available in German):
https://www.bka.de/DE/AktuelleInformationen/StatistikenLagebilder/ViktimisierungssurveyDunkelfeldforschung/viktimisierungssurveyDunkelfeldforschung_node.html

5. Metadata on source data

- Victims of physical assault (only available in German):
https://www.bka.de/DE/Presse/Listenseite_Pressemitteilungen/2019/Presse2019/190402_DVS2017.html

6. Timeliness and frequency

- Timeliness: t + 24 months
- Frequency: Irregular

7. Calculation method

- Unit of measurement: %

- Calculation method:

$$\text{Population subjected to physical violence} = \frac{\text{Persons being victim of a physical assault [weighted number]}}{\text{Persons taking part in the survey [weighted number]}} \cdot 100 \, [\%]$$

SDG Goal 16	**Peace, justice and strong institutions**
SDG Target 16.1	**Significantly reduce all forms of violence and related death rates everywhere**
SDG Indicator 16.1.3	**Proportion of population subjected to (a) physical violence; (b) psychological violence; and (c) sexual violence in the previous 12 months**
Time series	**Population who were victims of criminal offences**

1. General information on the time series

- Date of national metadata: 30 September 2021

- National data: http://sdg-indikatoren.de/en/16-1-3/

- Definition: The time series shows the percentage of the population who was subjected to the total of criminal offences, attempted and completed.

- Disaggregation: Not available.

2. Comparison with global metadata

- Date of global metadata: July 2016

- Global metadata: https://unstats.un.org/sdgs/metadata/files/Metadata-16-01-03.pdf

- The time series is not compliant with the global metadata, but provides additional information. It does not measure separately victims of physical, psychological or sexual violence. With regard to psychological violence, there is yet no consensus at the international level of the precise definition and methodology to measure psychological violence.

3. Data description

- The data are taken from the Police Crime Statistics (PCS) by the Federal Criminal Police Office (Bundeskriminalamt, BKA). The PCS covers known criminal offences, victims and suspects. It includes attempts as well as completed offences for every year. Since the data are summarising only cases which were brought to the attention of the police, our numbers underestimate the real situation. If a person is a victim of more than one crime or repeatedly victim of the same crime, it is counted multiple times. The data are calculated as a sum of the individual data sets of the Länder's criminal police bureaus.

4. Accessibility of source data

- Victims - T91 Total victims by age and sex: https://www.bka.de/EN/CurrentInformation/PoliceCrimeStatistics/2020/pcs2020_node.html
- The 2017 German Victimisation Survey - final report: https://www.bka.de/SharedDocs/Downloads/DE/Publikationen/Publikationsreihen/Forschungserge bnisse/2019ersteErgebnisseDVS2017EN.pdf;jsessionid=C16A4B31505277196B13E90C773A697E.l ive0602?__blob=publicationFile&v=3

5. Metadata on source data

- Victims of intentional homicide (only available in German): PKS 2016 yearbook volume 2 -victims: https://www.bka.de/DE/AktuelleInformationen/StatistikenLagebilder/PolizeilicheKriminalstatistik/P KS2016/pks2016_node.html

6. Timeliness and frequency

- Timeliness: t + 4 months
- Frequency: Annual

7. Calculation method

- Unit of measurement: %
- Calculation method:

$$\text{Population who were victims of criminal offences} = \frac{\text{Victims of criminal offences [number]}}{\text{Population [number]}} \cdot 100\,[\%]$$

SDG Goal 16	Peace, justice and strong institutions
SDG Target 16.1	Significantly reduce all forms of violence and related death rates everywhere
SDG Indicator 16.1.3	Proportion of population subjected to (a) physical violence; (b) psychological violence; and (c) sexual violence in the previous 12 months
Time series	Victims of criminal offences

1. General information on the time series

- Date of national metadata: 30 September 2021
- National data: http://sdg-indikatoren.de/en/16-1-3/
- Definition: The time series shows the total number of victims of criminal offences.
- Disaggregation: age group; sex

2. Comparison with global metadata

- Date of global metadata: July 2016
- Global metadata: https://unstats.un.org/sdgs/metadata/files/Metadata-16-01-03.pdf
- The time series is not compliant with the global metadata, but provides additional information. It only covers the total number of victims instead of the proportion of population.

3. Data description

- The data are taken from the Police Crime Statistics (PCS) by the Federal Criminal Police Office (Bundeskriminalamt, BKA). The PCS covers known criminal offences, victims and suspects. Multiple counting is possible in regard to the number of victims. If a person is a repeatedly victim, it is counted multiple times.
The data are calculated as a sum of the individual data sets of the Länder's criminal police bureaus. Data on population are the results of the latest population census (currently: 2011 Census) rolled forward in a breakdown by sex, age, marital status and citizenship, using both statistics of population change (migration, births, deaths, entering into marriages or registered same-sex partnerships) and information on changes in citizenship and the dissolution of marriages or registered same-sex partnerships. Before 2011, updated census data from 1987 (Federal Republic of Germany) and the population register of October 1990 (German Democratic Republic) were used. For the years before 2011 the results for population were calculated backwards using the census 2011 and migration, birth and death statistics.
