SDG Goal 1	**No poverty**
SDG Target 1.a	**Ensure significant mobilization of resources from a variety of sources, including through enhanced development cooperation, in order to provide adequate and predictable means for developing countries, in particular least developed countries, to implement programmes and policies to end poverty in all its dimensions**
SDG Indicator 1.a.2	**Proportion of total government spending on essential services (education, health and social protection)**
Time series	**Government expenditure on health**

1. General information on the time series

- Date of national metadata: 17 May 2021

- National data: http://sdg-indikatoren.de/en/1-a-2/

- Definition: The sub-indicator measures the share of government spending on health.Government outlays on health include expenditures on services provided to individual persons and services provided on a collective basis (for further information see COFOG code 07).

- Disaggregation: Not available.

2. Comparison with global metadata

- Date of global metadata: February 2020

- Global metadata: https://unstats.un.org/sdgs/metadata/files/Metadata-01-0a-02.pdf

- The global metadata only applies to the education component. Global metadata for the components health and social protection are still missing.

3. Data description

- The data are part of the national accounts of the Federal Statistical Office. The time series thereby calculates the percentage of government spending on health as part of the total amount of government spending. The data on government spending on health is classified based on the UN Classification of the Functions of Government.Besides the regular revisions of the time series (see below) a general revision of the European National and Regional Accounts was conducted in 2014.

4. Accessibility of source data

- Total government spending (only available in German): Fachserie 18 Reihe 1.4 – 2017: https://www.destatis.de/DE/Themen/Wirtschaft/Volkswirtschaftliche-Gesamtrechnungen-Inlandsprodukt/_inhalt.html
- Government spending on health (only available in German): Fachserie 18 Reihe 1.4 – 2017: https://www.destatis.de/DE/Themen/Wirtschaft/Volkswirtschaftliche-Gesamtrechnungen-Inlandsprodukt/_inhalt.html

5. Metadata on source data

- Quality report of National Accounts: https://www.destatis.de/EN/Methods/Quality/QualityReports/National-Accounts-Domestic-Product/einfuehrung.html

6. Timeliness and frequency

- Timeliness: t + 1.5 months
- Frequency: Annual

7. Calculation method

- Unit of measurement: %
- Calculation method:

$$\textbf{Government expenditure on health} = \frac{\text{Government spending on health}\,[\text{bn EUR}]}{\text{Total government spending}\,[\text{bn EUR}]} \cdot 100\,[\%]$$

SDG Goal 1	No poverty
SDG Target 1.a	**Ensure significant mobilization of resources from a variety of sources, including through enhanced development cooperation, in order to provide adequate and predictable means for developing countries, in particular least developed countries, to implement programmes and policies to end poverty in all its dimensions**
SDG Indicator 1.a.2	**Proportion of total government spending on essential services (education, health and social protection)**
Time series	**Government expenditure on education**

1. General information on the time series

- Date of national metadata: 17 May 2021

- National data: http://sdg-indikatoren.de/en/1-a-2/

- Definition: The sub-indicator measures the share of government spending on education.In particular government outlays on education include expenditures on services provided to individual pupils and students and expenditures on services provided on a collective basis. (for further information see COFOG code 09)

- Disaggregation: Not available.

2. Comparison with global metadata

- Date of global metadata: February 2020

- Global metadata: https://unstats.un.org/sdgs/metadata/files/Metadata-01-0a-02.pdf

- The time series is compliant with the global metadata. It is one of the three components of the SDG indicator.

3. Data description

- The data are part of the national accounts of the Federal Statistical Office. The time series thereby calculates the percentage of government spending on education as part of the total amount of government spending. The data on government spending on education is classified based on the UN Classification of the Functions of Government.Besides the regular revisions of the time series (see below) a general revision of the European National and Regional Accounts was conducted in 2014.

4. Accessibility of source data

- Total government spending (only available in German): Fachserie 18 Reihe 1.4 – 2017: https://www.destatis.de/DE/Themen/Wirtschaft/Volkswirtschaftliche-Gesamtrechnungen-Inlandsprodukt/_inhalt.html
- Government spending on education (only available in German): Fachserie 18 Reihe 1.4 – 2017: https://www.destatis.de/DE/Themen/Wirtschaft/Volkswirtschaftliche-Gesamtrechnungen-Inlandsprodukt/_inhalt.html

5. Metadata on source data

- Quality report of National Accounts: https://www.destatis.de/EN/Methods/Quality/QualityReports/National-Accounts-Domestic-Product/einfuehrung.html

6. Timeliness and frequency

- Timeliness: t + 1.5 months
- Frequency: Annual

7. Calculation method

- Unit of measurement: %
- Calculation method:

$$\textbf{Government expenditure on education} = \frac{\text{Government spending on education[bnEUR]}}{\text{Total government spending [bnEUR]}} \cdot 100 \, [\%]$$

SDG Goal 1	No poverty
SDG Target 1.a	**Ensure significant mobilization of resources from a variety of sources, including through enhanced development cooperation, in order to provide adequate and predictable means for developing countries, in particular least developed countries, to implement programmes and policies to end poverty in all its dimensions**
SDG Indicator 1.a.2	**Proportion of total government spending on essential services (education, health and social protection)**
Time series	**Government expenditure on social protection**

1. General information on the time series

• Date of national metadata: 17 May 2021

• National data: http://sdg-indikatoren.de/en/1-a-2/

• Definition: The sub-indicator measures the share of government spending on social protection.Government outlays on social protection include expenditures on services and transfers provided to individual persons and households and expenditures on services provided on a collective basis (for further information see COFOG code 10).

• Disaggregation: Not available.

2. Comparison with global metadata

• Date of global metadata: February 2020

• Global metadata: https://unstats.un.org/sdgs/metadata/files/Metadata-01-0a-02.pdf

• The global metadata only applies to the education component. Global metadata for the components health and social protection are still missing.

3. Data description

• The data are part of the national accounts of the Federal Statistical Office. The time series thereby calculates the percentage of government spending on social protection as part of the total amount of government spending. The data on government spending on social protection is classified based on the UN Classification of the Functions of Government.Besides the regular revisions of the time series (see below) a general revision of the European National and Regional Accounts was conducted in 2014.

4. Accessibility of source data

• Total government spending (only available in German): Fachserie 18 Reihe 1.4 – 2017: https://www.destatis.de/DE/Themen/Wirtschaft/Volkswirtschaftliche-Gesamtrechnungen-Inlandsprodukt/_inhalt.html

• Government spending on social protection (only available in German): Fachserie 18 Reihe 1.4 – 2017: https://www.destatis.de/DE/Themen/Wirtschaft/Volkswirtschaftliche-Gesamtrechnungen-Inlandsprodukt/_inhalt.html

5. Metadata on source data

• Quality report of National Accounts: https://www.destatis.de/EN/Methods/Quality/QualityReports/National-Accounts-Domestic-Product/einfuehrung.html

6. Timeliness and frequency

- Timeliness: t + 1.5 months
- Frequency: Annual

7. Calculation method

- Unit of measurement: %
- Calculation method:

$$\text{Government expenditure on social protection} = \frac{\text{Government spending on social protection [bnEUR]}}{\text{Total government spending [bnEUR]}} \cdot 100\,[\%]$$
