SDG Goal 16	**Peace, justice and strong institutions**
SDG Target 16.1	**Significantly reduce all forms of violence and related death rates everywhere**
SDG Indicator 16.1.2	**Conflict-related deaths per 100,000 population, by sex, age and cause**
Time series	**Conflict-related deaths**

1. General information on the time series

- Date of national metadata: 17 December 2021
- National data: http://sdg-indikatoren.de/en/16-1-2/
- Definition: The time series measures the total number of conflict-related deaths, expressed per 100,000 inhabitants.
- Disaggregation: Not available.

2. Comparison with global metadata

- Date of global metadata: December 2018
- Global metadata: https://unstats.un.org/sdgs/metadata/files/Metadata-16-01-02.pdf
- The time series is partly compliant with the global metadata. It only covers killed adult persons aged 18 and above and causes of death due to heavy weapons and explosive munitions, planted explosives and unexploded ordnance (UXO) and small arms and light weapons.

3. Data description

- The data on conflict-related deaths is based on a special evaluation by the Federal Ministry of Defence. The data covers killed adult persons aged 18 years and older and causes of death due to heavy weapons and explosive munitions, planted explosives and unexploded ordnance (UXO) and small arms and light weapons.
  The population data comes from the intercensal population updates, the basis of which is the last census conducted in 2011. The population data is rolled forward using statistical results on natural population change (births, deaths) and migrations. For 2010, the population was calculated backwards using the 2011 census and migration, birth and death statistics.
