The data is based on reports submitted by the police offices of the Länder, the BKA, the Federal Police (Bundespolizei) and the German customs authorities about police investigations which were concluded during the year under review.

     The population data comes from the Federal Statistical Office. The victim risk figure (per 100,000 inhabitants) is calculated on the basis of the population on 31 December of the previous year. Up to and including 2012, the data is based on the 1987 census (Federal Republic of Germany) and the population register as of 3 October 1990 (German Democratic Republic); for the years 2013 to 2023, it is based on the 2011 census, and from 2024 onwards, it is based on the 2022 census.
