

SDG Goal 17

Partnerships for the goals

SDG Target 17.3

Mobilize additional financial resources for developing countries from multiple sources

SDG Indicator 17.3.2

Volume of remittances (in United States dollars) as a proportion of total GDP

Time series

Personal remittances received

1. General information on the time series

- Date of national metadata: April 27, 2026
- National data: <https://sdg-indicators.de/17-3-2>
- Definition: The time series shows remittances received from private individuals. It consists of the items “personal remittances” and “compensation of employees” as defined in the sixth edition of the IMF's Balance of Payments Manual. Private remittances consist of all current transfers in the form of cash or in-kind payments made by resident households to non-resident households or received from them. Compensation of employees refers to the income of cross-border workers, seasonal workers, and other short-term workers employed in an economy where they are not residents, as well as that of residents employed by non-resident enterprises.
- Disaggregation: Not available.

2. Comparability with the UN metadata

- Date of UN metadata: September 2024
- UN metadata: <https://unstats.un.org/sdgs/metadata/files/Metadata-17-03-02.pdf>
- The time series is compliant with the UN metadata.

3. Data description

- The data is derived from an estimate by the World Bank. The Balance of Payments (BOP) from the International Monetary Fund (IMF) serves as the primary source of information for personal transfers, which are categorized under secondary income, and for the compensation of employees, classified as primary income of the current account.
Information from government agencies such as central banks and national statistical offices further complements the BOP data. When countries have missing data for certain years, this is addressed using methods like Last Observation Carried Forward (LOCF) and Next Observation Carried Backward (NOCB). If disaggregated data is unavailable, estimates are created based on historical ratios and trends.

4. Access to data source

- Personal remittances, received:
<https://data.worldbank.org/indicator/BX.TRF.PWKR.DT.GD.ZS?end=2024&locations=DE&start=1971&view=chart>

5. Metadata on source data

- Personal remittances: Metadata:
<https://databank.worldbank.org/reports.aspx?source=2&type=metadata&series=BX.TRF.PWKR.DT.GD.ZS>

6. Timeliness and frequency

- Timeliness: Not applicable.
- Frequency: Annual

7. Calculation method

- Unit of measurement: Percentage of GDP
- Calculation: Not applicable.
