

SDG Goal 15

Life on land

SDG Target 15.b

Mobilize significant resources from all sources and at all levels to finance sustainable forest management and provide adequate incentives to developing countries to advance such management, including for conservation and reforestation

SDG Indicator 15.b.1

(a) Official development assistance on conservation and sustainable use of biodiversity; and (b) revenue generated and finance mobilized from biodiversity-relevant economic instruments

Time series

ODA (commitments) for biodiversity

1. General information on the time series

- Date of national metadata: February 20, 2026
- National data: <https://sdg-indicators.de/15-b-1>
- Definition: The time series shows Germany's commitments (ODA) for biodiversity. It is measured in commitments of the resources to the partner country (versus disbursements of resources). ODA is defined as aid provided by official agencies that promotes and specifically targets the economic development and welfare of developing countries. ODA flows for biodiversity are recorded using the so-called "Rio markers". These relate to the Rio Conventions on climate change, biodiversity and desertification. For each ODA activity it is indicated whether it targets the objectives of the Rio Conventions as a 'principal' or 'significant' objective. Activities marked 'principal' would not have been funded but for that policy objective, activities marked 'significant' have other primary objectives but help meet the policy objective. Hence the markers are considered descriptive rather than strictly quantitative. Both scorings, principal and significant objective for biodiversity, are included in the time series.
- Disaggregation: Not available.

2. Comparability with the UN metadata

- Date of UN metadata: December 2025
- UN metadata: <https://unstats.un.org/sdgs/metadata/files/Metadata-15-0a-01.pdf>
- The time series is not compliant with the UN metadata, but provides additional information. It shows Germany's commitments (ODA) for biodiversity, while the UN metadata provides gross official development assistance received from the perspective of developing countries. The indicator refers to developing countries, which do not include Germany.

3. Data description

- ODA is the resource flows to countries and territories on the OECD Development Assistance Committee (DAC) List of ODA Recipients and to multilateral development institutions that are:
 - i) Provided by official agencies, including state and local governments, or by their executive agencies; and

ii) Concessional (i.e. grants and soft loans) and administered with the promotion of the economic development and welfare of developing countries as the main objective.

The DAC list of countries eligible to receive ODA is updated every three years and is based on per capita income.

Since the 1960s, Germany has reported annually its public and private resource flows for development cooperation to the DAC. Since October 2005, the Federal Statistical Office has been collecting and processing statistics on official development cooperation and other public and private flows to developing countries.

6. Timeliness and frequency

- Timeliness: t + 11 months
- Frequency: Annual

7. Calculation method

- Unit of measurement: Million EUR, Million USD, constant prices (2023)
- Calculation: Not applicable.

SDG Goal 15

Life on land

SDG Target 15.b

Mobilize significant resources from all sources and at all levels to finance sustainable forest management and provide adequate incentives to developing countries to advance such management, including for conservation and reforestation

SDG Indicator 15.b.1

(a) Official development assistance on conservation and sustainable use of biodiversity; and (b) revenue generated and finance mobilized from biodiversity-relevant economic instruments

Time series

ODA (gross disbursements) for biodiversity

1. General information on the time series

- Date of national metadata: February 20, 2026
- National data: <https://sdg-indicators.de/15-b-1>
- Definition: The time series shows Germany's official development assistance (ODA) for biodiversity. It is measured in gross disbursements of the resources to the partner country (versus commitments of resources). ODA is defined as aid provided by official agencies that promotes and specifically targets the economic development and welfare of developing countries. ODA flows for biodiversity are recorded using the so-called "Rio markers". These relate to the Rio Conventions on climate change, biodiversity and desertification. For each ODA activity it is indicated whether it targets the objectives of the Rio Conventions as a 'principal' or 'significant' objective. Activities marked 'principal' would not have been funded but for that policy objective, activities marked 'significant' have other primary objectives but help meet the policy objective. Hence the markers are considered descriptive rather than strictly quantitative. Both scorings, principal and significant objective for biodiversity, are included in the time series.
- Disaggregation: Not available.

2. Comparability with the UN metadata

- Date of UN metadata: December 2025
- UN metadata: <https://unstats.un.org/sdgs/metadata/files/Metadata-15-0a-01.pdf>
- The time series is not compliant with the UN metadata, but provides additional information. It shows Germany's official development assistance (ODA) for biodiversity, while the UN metadata provides gross official development assistance received from the perspective of developing countries. The indicator refers to developing countries, which do not include Germany.

3. Data description

- ODA is the resource flows to countries and territories on the OECD Development Assistance Committee (DAC) List of ODA Recipients and to multilateral development institutions that are:

i) Provided by official agencies, including state and local governments, or by their

executive agencies; and

ii) Concessional (i.e. grants and soft loans) and administered with the promotion of the economic development and welfare of developing countries as the main objective.

The DAC list of countries eligible to receive ODA is updated every three years and is based on per capita income.

Since the 1960s, Germany has reported annually its public and private resource flows for development cooperation to the DAC. Since October 2005, the Federal Statistical Office has been collecting and processing statistics on official development cooperation and other public and private flows to developing countries.

- Calculation: Not applicable.

SDG Goal 15

Life on land

SDG Target 15.b

Mobilize significant resources from all sources and at all levels to finance sustainable forest management and provide adequate incentives to developing countries to advance such management, including for conservation and reforestation

SDG Indicator 15.b.1

(a) Official development assistance on conservation and sustainable use of biodiversity; and (b) revenue generated and finance mobilized from biodiversity-relevant economic instruments

Time series

ODA (gross disbursements) to the forestry sector

1. General information on the time series

- Date of national metadata: February 20, 2026
- National data: <https://sdg-indicators.de/15-b-1>
- Definition: The time series shows Germany's official development assistance (ODA) to the forestry sector. It is measured in gross disbursements of the resources to the partner country (versus commitments of resources). ODA is defined as aid provided by official agencies that promotes and specifically targets the economic development and welfare of developing countries. For ODA flows, data on the sector of destination are recorded using 5-digit codes so called purpose codes. The forestry sector is identified by all the purpose codes starting with 312. These cover forest policy, forest development and research, fuelwood and charcoal as well as forestry education and forestry services amongst other topics.
- Disaggregation: Not available.

2. Comparability with the UN metadata

- Date of UN metadata: December 2025
- UN metadata: <https://unstats.un.org/sdgs/metadata/files/Metadata-15-0b-01.pdf>
- The time series is not compliant with the UN metadata, but provides additional information. It shows Germany's official development assistance (ODA) to the forestry sector, while the UN metadata provides gross official development assistance received from the perspective of developing countries. The indicator refers to developing countries, which do not include Germany.

3. Data description

- ODA is the resource flows to countries and territories on the OECD Development Assistance Committee (DAC) List of ODA Recipients and to multilateral development institutions that are:
 - i) Provided by official agencies, including state and local governments, or by their executive agencies; and
 - ii) Concessional (i.e. grants and soft loans) and administered with the promotion of the economic development and welfare of developing countries as the main objective.

The DAC list of countries eligible to receive ODA is updated every three years and is based on per capita income.

Since the 1960s, Germany has reported annually its public and private resource flows for development cooperation to the DAC. Since October 2005, the Federal Statistical Office has been collecting and processing statistics on official development cooperation and other public and private flows to developing countries.
