

SDG Goal 1

No poverty

SDG Target 1.3

Implement nationally appropriate social protection systems and measures for all, including floors, and by 2030 achieve substantial coverage of the poor and the vulnerable

SDG Indicator 1.3.1

Proportion of population covered by social protection floors/ systems, by sex, distinguishing children, unemployed persons, older persons, persons with disabilities, pregnant women, newborns, work-injury victims and the poor and the vulnerable

Time series

Minimum income benefits ratio

1. General information on the time series

- Date of national metadata: February 9, 2026
- National data: <https://sdg-indicators.de/1-3-1>
- Definition: The time series shows the proportion of recipients of minimum income benefits in the total population (or the respective population group).

The following benefits are included in the minimum social security benefits:

- Total standard benefit (citizen's income for those eligible for benefits who are capable of working/citizen's income for those eligible for benefits who are not capable of working) in accordance with Book II of the Social Code (SGB II "Basic security for job seekers"),
- Assistance for living expenses outside of institutions in accordance with Book XII of the Social Code (SGB XII "Social Assistance"),
- Basic security in old age and in the event of reduced earning capacity in accordance with Book XII of the Social Code (SGB XII "Social Assistance"),
- Standard benefits in accordance with the Asylum Seekers Benefits Act (AsylbLG).

In addition to the minimum income benefits mentioned above, there are various other social benefits, such as housing allowance or child supplement, which are not included in these minimum social benefits but also contribute to the basic financial security of persons or households in need of assistance.

- Disaggregation: sex, länder

2. Comparability with the UN metadata

- Date of UN metadata: March 2025
- UN metadata:
<https://unstats.un.org/sdgs/metadata/files/Metadata-01-03-01a.pdf>
<https://unstats.un.org/sdgs/metadata/files/Metadata-01-03-01b.pdf>
- The time series is compliant with the UN metadata. However, it only covers one of the nine sub-indicators.

3. Data description

- The data comes from statistics on social security systems compiled by federal statistical Office and the statistical offices of the Länder.
The underlying statistics are federal statistics which, with the exception of statistics on recipients of basic income support in old age and in the event of reduced earning capacity under Chapter 4 of SGB XII, are collected on a decentralized basis. The Federal Statistical Office develops the survey and processing concept and prepares the organization and technical implementation. The statistical offices of the Länder carry out the surveys. The Federal Statistical Office compiles and publishes the federal results from the results of the federal states.

On January 1, 2015, the statistics on recipients of basic income support in old age and in the event of reduced earning capacity were converted from decentralized annual statistics to centralized quarterly statistics. Since then, the parties required to provide information or the agencies commissioned by them have been transmitting the data for the statistics directly to the Federal Statistical Office.

All statistics on recipients of social assistance benefits are compiled as full surveys. These are all secondary statistics, in which existing administrative data is reported for statistical purposes and then processed.

From the 2011 reporting year onwards, the minimum income rate is based on the updated results of the 2011 census. Until the 2010 reporting year, the minimum income rates were based on the extrapolation of the population based on earlier censuses (the 1987 census in the former federal territory and the 1990 register census in the former GDR).

4. Access to data source

- Minimum income benefits ratio (only available in German)
<https://www.statistikportal.de/de/sbe/ergebnisse/mindestsicherung/b-11-mindestsicherungquote>

5. Metadata on source data

- Minimum income benefits ratio (only available in German)
<https://www.statistikportal.de/de/sbe/ergebnisse/mindestsicherung/b-11-mindestsicherungquote>

6. Timeliness and frequency

- Timeliness: t + 11 month
- Frequency: Annual

7. Calculation method

- Unit of measurement: percentage
- Calculation: Not applicable.
