SDG Goal 8	Decent work and economic growth
SDG Target 8.8	Protect labour rights and promote safe and secure working environments for all workers, including migrant workers, in particular women migrants, and those in precarious employment
SDG Indicator 8.8.1	Fatal and non-fatal occupational injuries per 100,000 workers, by sex and migrant status
Time series	Fatal occupational accidents

1. General information on the time series
   - Date of national metadata: September 2, 2026
   - National data: https://sdg-indicators.de/8-8-1
   - Definition: The time series shows the number of fatal accidents at work per 100,000 employees. An accident at work is a discrete event occurring whilst at work that results in physical or psychological harm. Accidents at work are classified as fatal if the person involved dies within 30 days of the accident.
   - Disaggregation: Sex, Economic activity
2. Comparability with the UN metadata
   - Date of UN metadata: March 2026
   - UN metadata: https://unstats.un.org/sdgs/metadata/files/Metadata-08-08-01.pdf
   - The time series is compliant with the UN metadata.
3. Data description
   - Data collection takes place as part of the administrative data collection scheme “European Statistics on Accidents at Work (ESAW)”. The ESAW methodology complies with the ‘Resolution on Statistics on Accidents at Work (due to accidents at work)’ adopted by the International Labour Office, which was approved in October 1998 by the 16th International Conference of Labour Statisticians. The data are based on information provided by the statutory accident insurance schemes.

     Accidents at work involving civil servants are not included. The number of people in employment is based on the definition of the International Labour Organisation (ILO): a person is considered to be in employment if they are aged 15 or over and were in employment during the reference period. Persons who are officially in employment but who did not carry out their work temporarily during the reference period are also considered to be in employment.
4. Access to data source
   - Accidents at work: Eurostat table [hsw_mi08]: https://ec.europa.eu/eurostat/databrowser/view/hsw_mi08/default/table?lang=en

- Accidents at work by economic activities: Eurostat table [hsw_ph3_04]: https://ec.europa.eu/eurostat/databrowser/view/hsw_ph3_04/default/table?lang=en

5. Metadata on source data
   - Eurostat metadata on ESAW methodology: http://ec.europa.eu/eurostat/cache/metadata/en/hsw_acc_work_esms.htm
   - Quality Report: Monthly unemployment statistics according to the ILO concept: Monthly unemployment statistics according to the ILO concept - Quality Report - 11/2015-10/2016
   - Fatal Accidents at work (only available in German): https://www.destatis.de/DE/Themen/Arbeit/Arbeitsmarkt/Indikatoren-Qualitaet-Arbeit/_inhalt.html#109676

6. Timeliness and frequency
   - Timeliness: t + 18 months
   - Frequency: Annual

7. Calculation method
   - Unit of measurement: Per 100,000 employees
   - Calculation: Not applicable.
