

SDG Goal 17

Partnerships for the goals

SDG Target 17.7

Promote the development, transfer, dissemination and diffusion of environmentally sound technologies to developing countries on favourable terms, including on concessional and preferential terms, as mutually agreed

SDG Indicator 17.7.1

Total amount of funding for developing and developed countries to promote the development, transfer, dissemination and diffusion of environmentally sound technologies

Time series

Output of the environmental goods and services sector (EGSS)

1. General information on the time series

- Date of national metadata: November 24, 2025
- National data: <https://sdg-indicators.de/17-7-1>
- Definition: The time series shows the total output of the environmental goods and services sector.
- Disaggregation: economic activity, environmental protection and/or resource management sector

2. Comparability with the UN metadata

- Date of UN metadata: April 2025
- UN metadata: <https://unstats.un.org/sdgs/metadata/files/Metadata-17-07-01.pdf>
- The time series is compliant with the UN metadata.

3. Data description

- The time series shows the total output of the environmental goods and services sector, in accordance with Annex V, "Module for environmental goods and services sector accounts", to regulation (EU) No 691/2011 of the European Parliament and of the Council of 6 July 2011 on European environmental economic accounts, as amended from time to time. Environmental goods and services are those that are primarily used to protect the environment or manage resources, or that are at least deliberately designed to be more environmentally friendly or resource-efficient than comparable goods and services. Environmental goods and services are produced in a wide range of industries. In this sense, the environmental goods and services sector is a cross-cutting industry. Data concerning the environmental goods and services sector are part of the annual publications of the German environmental-economic accounts.

4. Access to data source

- Environmental goods and services (only available in German):

Time series

Gross fixed capital formation for environmental protection activities

1. General information on the time series

- Date of national metadata: February 13, 2023
- National data: <https://sdg-indicators.de/17-7-1>
- Definition: The time series shows gross fixed capital formation of general government and corporations for environmental protection activities.
- Disaggregation: sector

2. Comparability with the UN metadata

- Date of UN metadata: April 2025
- UN metadata: <https://unstats.un.org/sdgs/metadata/files/Metadata-17-07-01.pdf>
- The time series is partly compliant with the UN metadata. The time series is based on data from the environmental protection expenditure accounts and not on data from the environmental goods and services sector accounts. It is hence not compliant with the

3. Data description

- The time series shows gross fixed capital formation of general government and corporations for environmental protection activities, inclusive of pertinent net capital transfers to the rest of the world. Environmental protection includes all activities and actions aimed at preventing, reducing and eliminating pollution and any other degradation of the environment. Data on environmental protection expenditure are part of the annual publications of the German environmental-economic accounts.
