SDG Goal 8	Decent work and economic growth
SDG Target 8.10	Strengthen the capacity of domestic financial institutions to encourage and expand access to banking, insurance and financial services for all
SDG Indicator 8.10.1	(a) Number of commercial bank branches per 100,000 adults and (b) number of automated teller machines (ATMs) per 100,000 adults
Time series	(a) Branches of payment service providers and (b) ATMs of national payment service providers

1. General information on the time series
   - Date of national metadata: December 20, 2021
   - National data: https://sdg-indicators.de/8-10-1
   - Definition: The time series shows (a) the number of branches of payment service providers and (b) the number of ATMs operated by national payment service providers offering payment services to non-payment service providers (in total), in each case per 100,000 inhabitants aged 15 and over (population as at 31 December of the reporting year).
   - Disaggregation: Physical access to banking services
2. Comparability with the UN metadata
   - Date of UN metadata: March 2023
   - UN metadata: https://unstats.un.org/sdgs/metadata/files/Metadata-08-10-01.pdf
   - The time series is compliant with the UN metadata.
3. Data description
   - The data on (a) the branches of payment service providers and (b) the ATMs of national payment service providers are taken from the Deutsche Bundesbank's payments statistics. The collection of payment statistics focuses on payments made by non-payment service providers in their capacity as customers of national payment service providers (Payment Service Provider, PSP). The corresponding reports are used to analyse payment behaviour and the financial structure of Germany and also represent an important source of data for the development, management and supervision of payment and securities settlement systems.

     Since the 2007 reporting year, payment statistics have been harmonised within the European Monetary Union. In Germany, data is collected through a comprehensive survey of all monetary financial institutions (MFIs), with the exception of money market funds.

     Since the 2014 reference period, the group of reporting entities has been extended to include payment institutions. The statistics therefore now cover all national payment service providers, i.e. MFIs and payment institutions. Money market funds are exempt

from the reporting requirement. In addition, new reporting items have been introduced and the geographical breakdown has been expanded. Due to methodological differences regarding the content of the reports, the results from the 2014 reporting year onwards are only comparable to those of previous years to a limited extent.

For the calculation of population data, the retrospectively adjusted reference-date population figures from the Federal Statistical Office are used. For 2010, it was determined on the basis of the 2011 census and migration, birth and death statistics; for the years 2012 to 2021, the calculation was made on the basis of the 2022 census.
