

SDG Goal 15

Life on land

SDG Target 15.b

Mobilize significant resources from all sources and at all levels to finance sustainable forest management and provide adequate incentives to developing countries to advance such management, including for conservation and reforestation

SDG Indicator 15.b.1

(a) Official development assistance on conservation and sustainable use of biodiversity; and (b) revenue generated and finance mobilized from biodiversity-relevant economic instruments

Time series

Commitments and gross disbursements of Official Development Assistance for biodiversity and the forestry sector

1. General information on the time series

- Date of national metadata: June 15, 2026
- National data: <https://sdg-indicators.de/15-b-1>
- Definition: The time series shows Germany's commitments and gross disbursements of Official Development Assistance (ODA) for biodiversity and the forestry sector.

The identification of biodiversity-related Official Development Assistance (ODA) is based on the Rio Markers developed by the OECD Development Assistance Committee (DAC). These markers relate to the three Rio Conventions: the Convention on Biological Diversity (CBD), the United Nations Framework Convention on Climate Change (UNFCCC), and the United Nations Convention to Combat Desertification (UNCCD).

For each ODA activity, it is specified whether biodiversity-related objectives constitute a principal objective or a significant objective. Activities classified as having biodiversity as a principal objective would not have been undertaken without the biodiversity objective. Activities classified as having biodiversity as a significant objective primarily pursue other development objectives but also make a substantial contribution to the conservation and sustainable use of biological diversity.

The Rio Markers are primarily intended for the qualitative or descriptive classification of development co-operation activities and are only of limited suitability for the quantitative measurement of biodiversity-related financing. The present time series includes both ODA commitments for which biodiversity is reported as a principal objective and activities for which biodiversity is reported as a significant objective.

The allocation is based on Creditor Reporting System (CRS) purpose codes. The CRS is the OECD's (Organisation for Economic Co-operation and Development) international standard classification system for development finance and is used to classify development cooperation activities by sector and purpose.

The following CRS codes are included:

CRS-Codes 312: Forestry

- Disaggregation: Purpose, Type of Official Development Assistance

2. Comparability with the UN metadata

- Date of UN metadata: December 2025
- UN metadata: <https://unstats.un.org/sdgs/metadata/files/Metadata-15-0b-01.pdf>

Note: The indicator refers to developing countries, of which Germany is not a member.

- The time series is not compliant with the UN metadata, but provides additional information. The reasons are as follows:
 - It shows Germany's ODA, while the UN metadata provides information on the development assistance received from the perspective of developing countries.

3. Data description

- According to the OECD, ODA is government support that is specifically “designed to promote the economic and social development of developing countries.”

ODA is an internationally recognised measure agreed within the OECD Development Assistance Committee (DAC). It comprises financial flows provided by official agencies to developing countries, their nationals, or international organisations for the benefit of developing countries. Private contributions and charitable donations are not recorded as ODA.

The DAC List of ODA Recipients is generally revised every three years by the DAC on the basis of the World Bank income classifications.

4. Access to data source

- OECD – ODA for biodiversity [Selections: RioMarkers: Aid (ODA) activities targeting global environmental objectives; Sector: All sectors; Marker: Biodiversity, Score: Principal und Significant]:
