2. Comparability with the UN metadata
- Date of UN metadata: August 2024
 - UN metadata: <https://unstats.un.org/sdgs/metadata/files/Metadata-17-17-01.pdf>

Note: The indicator refers to developing countries, of which Germany is not a member.

- The time series is not compliant with the UN metadata, but provides additional information. The reasons are as follows:
 - o It shows Germany's ODA, while the UN metadata provides information on the development assistance received from the perspective of developing countries.
3. Data description
- According to the OECD, ODA is government support that is specifically "designed to promote the economic and social development of developing countries."

ODA is an internationally recognised measure agreed within the OECD Development Assistance Committee (DAC). It comprises financial flows provided by official agencies to developing countries, their nationals, or international organisations for the benefit of developing countries. Private contributions and charitable donations are not recorded as ODA.

The DAC List of ODA Recipients is generally revised every three years by the DAC on the basis of the World Bank income classifications.
