SDG Goal 5	Gender equality
SDG Target 5.b	Enhance the use of enabling technology, in particular information and communications technology, to promote the empowerment of women
SDG Indicator 5.b.1	Proportion of individuals who own a mobile telephone, by sex
Time series	Mobile penetration rate

1. General information on the time series
   - Date of national metadata: December 13, 2021
   - National data: https://sdg-indicators.de/5-b-1
   - Definition: The time series shows the number of active SIM cards as a proportion of the total population. SIM cards are considered active if they have been used for communication within the last three months or if an invoice has been issued for them during this period.
   - Disaggregation: Not available.
2. Comparability with the UN metadata
   - Date of UN metadata: July 2024
   - UN metadata: https://unstats.un.org/sdgs/metadata/files/Metadata-05-0B-01.pdf
   - The time series is not compliant with the UN metadata, but provides additional information. It shows only the total number of active SIM cards and does not reflect their distribution within the population.
3. Data description
   - The data is taken from the annual report of the Bundesnetzagentur, which is responsible, amongst other things, for regulating the telecommunications market. This report provides an overview of the current market situation.
4. Access to data source
   - Annual Report Telecommunication (only available in German): https://www.bundesnetzagentur.de/DE/Allgemeines/Presse/Mediathek_3/start.html
5. Metadata on source data
   - Not available.
6. Timeliness and frequency
   - Timeliness: t + 8 months
   - Frequency: Annual
7. Calculation method
   - Unit of measurement: Percentage
   - Calculation: Not applicable.
